

## PhD or Postdoctoral position (m/f/d) for research in wireless communication systems

Job-ID: 31214/22 | Department: System Architectures | Salary: as per tariff TV-L | Working time: 40h/week (part-time work option) | Limitation: initially 2 years with option of extension for three more years | Entry Date: 01.04.2023

IHP is an institute of the Leibniz Association and conducts research and development of silicon-based systems and ultra-high-frequency circuits and technologies including new materials. It develops innovative solutions for application areas such as wireless and broadband communication, security, medical technology, industry 4.0, automotive industry, and aerospace. IHP employs approximately 350 people. It operates a pilot line for technological developments and the preparation of high-speed circuits with 0.13/0.25  $\mu\text{m}$ -SiGe-BiCMOS technologies, located in a 1500 m<sup>2</sup> cleanroom that meets the highest industrial nanotechnology requirements.

### The position:

As a member of the research group Wireless Broadband Communications within the Department System Architectures, you will contribute to research into the investigation and development of Physical Layer Design (PHY) and Data Link Layer (DLL) for high-data-rate wireless systems. Your tasks will include developing and implementing scalable high-performance PHY/DLL digital processors. An international team of 20 scientists including very experienced scientists as well as several PhD students is looking forward to you. Flat hierarchies and mutual support are important to us. We see diversity of perspectives as a great advantage for our team. We strive for a balanced gender mix in our team.

### So you aspire a doctorate?

We highly encourage you to pursue your goal. Within the doctorate with the working title *“Investigation and development of a PHY/DLL layers and network interfaces for high-data-rate wireless systems”*, it is intended to develop concepts for new PHY/DLL processing algorithms. The doctorate is supported by an experienced supervisor and accompanied within the framework of a supervision agreement. We aim together for a completion within 3-5 years. After one and a half years, the topic will be finally defined and the contract duration will be adjusted accordingly by mutual agreement to the foreseeable doctoral period.

### You already have finished a doctorate?

You will broaden and deepen your expertise and have opportunities to build your reputation as a scientist in international and interdisciplinary projects with global visibility at the edge of top-notch technologies.

### Your qualifications:

You hold a Master's degree in Communications Engineering, Electronics Engineering, Computer Science or a comparable study area. You are already experienced in Wireless Communications. You are familiar with MATLAB or similar tools as well as Hardware Description Languages such as VHDL/Verilog. Ideally, you have some background in hardware development using VHDL/Verilog and FPGA implementation. It would be desirable that you also have a background in computer science and are familiar with known networking protocols.

You are also a strong team player. We are looking for a team member, who is able to structure his or her own work and to bring a well-organized and systematic way of working into the cooperation with creative minds. You are an ideal match for this position, when you have practical, analytical and problem-solving skills, very strong communicative skills and the ability to quickly learn how to operate the latest technical equipment including various software. It is necessary that you confidently handle the English language. Knowledge of the German language is welcome but not mandatory. The consolidating of German language skills is expected and highly encouraged, for example in in-house language courses and intensive courses.

### Our Offer:

Do research in a challenging, multinational environment giving you excellent career opportunities. You will have the chance to establish international reputation at the edge of top-notch technologies. An orientation guide will help you to quickly integrate into the institute and to familiarize yourself with the field.

It is important to us to support the individual career developments (e.g. conferences, advanced trainings) as well as the personal needs of our employees by offering flexible working hours and the possibility to work off-site. The compatibility of work and family is highly valued. More information about our scientific excellence and the working environment at IHP can be found on our website.

IHP is TOTAL E-QUALITY-certified for equal opportunities for women and men at work and actively pursues the equality of all gender and all groups of people. We promote the professional development of women and strongly encourage them to apply. Disabled applicants, qualified according to the above criteria, will be given preference over other candidates with equivalent relevant qualifications.

### Your application:

Have we sparked your interest? Then we look forward to receiving your application until **31.01.2023** via our [online application form](#).
